

Sanaku.

Every missed call has a price tag.

We answer the calls and enquiries you are currently losing — after hours, at lunch, while your team is with a customer — under **your** name and your number. A plumber missing six calls a week who recovers just two jobs has already paid for the service. The rest is upside.

Try it for 30 days before you pay a monthly fee.

You pay the setup fee to have it built — never more than \$750 up front — then run it for a month and watch what it catches. If it does not pay for itself, walk away. You keep every lead it caught and owe nothing further.

AVAILABLE NOW FOR HOME-SERVICE BUSINESSES

AI Phone Agent

Answers every call you miss, qualifies the caller, and books the job.

\$750 to start · 30 days free · then \$350/month

400 min included, then \$0.45 per min · or \$125 per job booked

Missed-Call Text-Back

A call goes unanswered and the caller gets a text from your number within seconds.

\$500 to start · 30 days free · then \$250/month

500 texts included, then \$0.05 per text · \$50 per qualified lead

After-Hours Intake

When you are closed, the three questions that qualify a lead get asked anyway.

\$400 to start · 30 days free · then \$200/month

\$50 per qualified lead

What we will and will not do.

Callers are told they are speaking with an automated assistant, and that the call is recorded, before anything else is asked.

Texts reply only to people who just called you, carry your business name, and honour STOP immediately. Requires A2P 10DLC registration of your number, which we handle.

Escalation rules and quiet hours are yours to set. No message goes out between 9pm and 8am local time unless you have marked it urgent.

In development, not yet available: Instant Lead Callback, After-Hours Answering, Spanish-Speaking Agent, Review Requests, Lead Nurture Sequences, Reminders & No-Show Recovery. Listed so you can plan, not so it can be sold to you today.

[Reply and we'll set up your number →](#)

Prices are per service and current as of 2026-08-03. Every lead we bill for is logged with a timestamp you can audit — we bill from our own meter, never from anything you report to us.
