

Sanaku.

The patient who reaches voicemail books somewhere else.

We answer the calls and enquiries you are currently losing — after hours, at lunch, while your team is with a customer — under **your** name and your number. Booking calls hit voicemail at lunch and after close, and most of those patients do not call back — they book with the next practice.

Try it for 30 days before you pay a monthly fee.

You pay the setup fee to have it built — never more than \$750 up front — then run it for a month and watch what it catches. If it does not pay for itself, walk away. You keep every lead it caught and owe nothing further.

AVAILABLE NOW FOR MEDICAL & DENTAL PRACTICES

Missed-Call Text-Back

A missed call gets an immediate text offering to book or route the caller.

\$650 to start · 30 days free · then \$325/month

500 texts included, then \$0.07 per text

Requires a signed BAA covering every vendor in the call path before go-live.

After-Hours Intake

Out-of-hours patients can request an appointment instead of waiting for morning.

\$550 to start · 30 days free · then \$275/month

Requires a signed BAA covering every vendor in the call path before go-live.

What we will and will not do.

Requires a signed BAA before go-live. Messages carry no clinical detail. Flat fee only - per-patient compensation can implicate anti-kickback rules.

Requires a signed BAA. Collects the minimum necessary and never asks for clinical detail.

In development, not yet available: AI Front-Desk Agent, After-Hours Answering, Spanish-Speaking Agent, Recall & Reactivation, Reminders & No-Show Recovery. Listed so you can plan, not so it can be sold to you today.

[Reply and we'll set up your number →](#)

Prices are per service and current as of 2026-08-03. Every lead we bill for is logged with a timestamp you can audit — we bill from our own meter, never from anything you report to us.
